

CTL Decision Sheet

Standard: IEC 60335-1:1976, 2 nd Ed.	Sub clause: 26.7	Sheet No. DSH-463
Subject: Terminals for external conductors	Key words: - pressure plate for pillar terminals	Decision taken at the 40th CTL meeting 2003
Question: Shall the pressure plate of pillar type terminals be considered for the dimensions? Rationale: See question. Decision: In case of pillar type terminals with a captive pressure plate, the dimension of the pressure plate is taken into account for the measurement of the difference between the diameter of the hole and the nominal thread diameter, unless the pressure plate is so thin that it is deformed by the screw operation. <u>EXPLANATION:</u> The same decision (n.55) is present in the OSM/HA decision list
