

**COLLECTION OF THE CTL DECISIONS
DECISION SHEET**

Standard: IEC 60335-1:1976, 2 nd Ed.	Sub clause: 27.2	Sheet No. DSH 465
Subject: Provision for earthing.	Key words: - pressure plate for pillar terminals	Decision taken at the 40 th CTL meeting 2003
Question: Is a pressure plate needed for earthing terminals of the pillar type? Rationale: See question. Decision: A pressure plate is not required for pillar type earthing terminals, provided the terminals contain resilient means of protection against accidental loosening <u>EXPLANATION:</u> The same decision (n.59) is present in the OSM/HA decision list Was discussed in CTL but the decision was not clear.
