

COLLECTION OF CTL DECISIONS

Decision

Standard: IEC60950, 2 nd and 3 rd	Sub clause: 2.9.3, Table 6, Condition 2	Sheet n. 381 Page 1 (1)
Subject: Affect of adhesive on Comparative Tracking Index (CTI) of Insulating Tape	Key words: -comparative tracking index -CTI -insulating tape -adhesive	Decision confirmed at CTL 38th meeting
Question: The measured Comparative Tracking Index (CTI) for an insulating tape with adhesive present can be different from that for the insulating tape without the adhesive present. The creepage distances to be applied depend upon the CTI of the insulating material. Should the presence of adhesive on the insulating tape be considered in determining the CTI when determining the creepage distances requirements to be applied?		
Decision: Yes.
