### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### Useful links:

IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

### History of changes

<u>Date</u>	<u>Brief summary of changes</u>
<u>2016-06-01</u>	<u>Inclusion of various CMC and PAC decisions taken in the past: AAG/547/DSH, PAC/1619/DSH, PAC 1798c), ACAG/1266/DSH, ACAG-PDSH 837, ACAG/1004/DSH, recommendation A7 from the 2015 WG 9 report to CMC, see CMC decision 41/2015, CMC 29.2/2004, CMC Decision 072/2011, PAC/24-2014/DSH, PAC/45-2015/DSH, PAC/22-2012/DSH (Previously 2023), AAG / 527, PAC Decision 65/2015, Decision Misc. 1 Geneva 2007, CMC Decisions, CMC 16a/2009, CMC 005/2012 on Production Line Testing, PAC ACAG1397DSH, CMC 19c/2005 (Shanghai), PAC/36-2012/DSH, PAC/26-2014/DSH, PAC/37-2015/DSH. The PAC recommended that CMC revise CMC Decision 19/05, CMC Decision 30/2000.</u> <u>Removal of redundant information.</u> <u>Harmonization of terminology</u> <u>Removal of French language from certificate templates</u>

<u>Effective date</u>	<u>Target revision date</u>
<u>2016-06-01</u>	<u>2019-06-01</u>

## 1 Scope

This document provides the framework to ensure that all National Certification Bodies issue IECEE deliverables in a consistent manner.

### 2.4. General requirements

#### 4.4 2.1 Reference Numbers of the ~~CB Test Certificates~~

The reference numbers should begin with the reference letters according to ISO of the relevant countries (AT for Austria, BE for Belgium, etc.). The numbers should be running continuously year after year. The year of issue should not be mentioned in the reference number.

In member countries with several Issuing and Recognizing NCBs the issuing NCB shall be indicated within the Test Certificate number~~on the CB Test Certificate.~~

#### 2.4.2 Signature requirements

~~2-~~ In addition to identifying the printed name of the signatory, CB Test Certificates shall always be signed by the authorized person(s). Electronic signatures are acceptable provided there is a provision to track who is the signatory. Providing just a printed name does not fulfil the accepted understanding of an electronic signature.

~~3. Corrections, Administrative Modifications and Technical Modifications to Issued CB Test Certificates~~Changes to Issued CB Test Certificates

#### 3.1 New edition or amendment of applied standard(s).

A new CB Test Certificate shall be issued with a new CB Test Certificate number. The CB Test Report matching the new edition of the standard shall be attached.

#### 3.2 Technical modifications to products covered by CB Test Certificates.

Technical modifications to products always require either an Amendment Test Report (See OD 2020, clause 5) or a new complete Test Report (See OD 2020, clause 5.3.2).

Technical modifications to products are limited to three after which a new CB Test Certificate and new complete Test Report shall be issued.

The CB Test Certificate shall identify the nature of such technical modification under "Additional Information." The CB Test Certificate number shall identify that technical modification was made to the product by adding a suffix (i.e. M1, M2, and M3).

The amended CB Test Certificates shall include the original issue date and revision date.

#### 3.3 Certificates requiring changes due to misprints and changes to names or addresses and similar.

There is unlimited number of changes allowed in this case.

Disclaimer: This document is controlled and has been released electronically. Only the version on the IECEE Website is the current document version

**Comment [JQ1]:** Test Certificate is the correct general term. Section 10 lists the different types of Test Certificates, only one of which is a CBTC.

**Formatted:** No bullets or numbering, Tab stops: 2.5 cm, Left + Not at 6.6 cm

**Formatted:** PARAGRAPH, No bullets or numbering

**Comment [02]:** JW\_ this is to address decision AAG/547/DSH from 2007

**Comment [tsm3]:** Revision to clause 2 to 2.5 is based on WG 10's proposal, as per their report to the 2016 CMC meeting.

A short description concerning the reason for the change shall be added in the "Additional Information." The CB Test Certificate shall be re-issued with the same Certificate number but the letter A shall be added after the Certificate number (i.e. A1, A2, A3, etc...) depending on how many changes have been made to the original Certificate.

The original issue date of the certificate and the date of the change shall be included on the Certificate.

An Amendment Test Report according to OD 2020, Part 5 shall be attached to the reissued Certificate, when necessary.

3.4 As an alternative to corrections to the CB Test Certificates addressed in 2.3, for minor changes, such as simple misprints, an addendum sheet correctly signed may be used.

3.5 In special cases, the requirements of ISO/IEC 17065 regarding tracking and document control can be applied in lieu of the procedure described in 2.1 and 2.4.

3.2.6 Adding additional factories to previously issued CB Test Certificates is dealt with as an administrative modification.

2.3.7 New models can be added to an existing CBTC/CBTR, however a new certificate must be issued.

**Comment [04]:** This is to address decision PAC/1619/DSH (CMC Tel Aviv)

**Comment [05]:** To address PAC 1798c)

~~a) Issued due to new edition or amendment of applied standard(s).~~

~~**Decision:** A new CB Test Certificate is issued with a new Ref.Certif.No. (CCB meeting Frankfurt am Main, 1996, and CCB meeting New Delhi, 1997)~~

~~b) Issued due to misprints, changes of names or addresses.~~

~~**Decision:** The CB Test Certificate shall be re-issued with the same Ref.Certif.No. but the letter A shall be added after the Ref.Certif.No. i.e. A1, A2, A3 depending on how many changes have been made to the original Certificate. A new date and signature is required with information which Ref.Certif.No. is replaced and a short description concerning the reason for the replacement. (CCB meeting Frankfurt am Main, 1996, and CCB meeting New Delhi, 1997)~~

~~e) On the front page of the Test Report Form the following addition should be included:~~

- ~~"Appendix to Test Report, Reference No. ...."~~
- ~~"Modification on the appliances"~~
- ~~"Modification to clause"~~
- ~~"Pages concerned:"~~

~~**Decision:** (CMC meeting Geneva, Switzerland, 2001)~~

~~The CMC agreed on the following:~~

~~2) Modifications on certified product are limited to three, after which a new CB Test Certificate shall be issued. This shall not preclude to issuing a new CB Test Certificate at every modification if the Member NCBs wish to do so.~~

Disclaimer: This document is controlled and has been released electronically. Only the version on the IEC EE Website is the current document version

- 3) ~~When a product is subject to "Modifications" irrespective of the suffix used to identify the CB Test Certificate i.e. the letter "M" followed by 1, 2 or 3, the CB Test Certificate shall clearly identify the nature of such "Modifications" under "Additional Information".~~
- 4) ~~Re-Issued CB Test Certificates shall include the original issue date and revision date under "Additional Information".~~

### 43. Listing Product Categories and Product Standards

~~3.4 4.1~~ The ~~Test Certificate~~ CBTC shall list only the ~~Product Category(ies) and~~ Product Standard(s) against which the product has been assessed (tested and evaluated) and determined to be in compliance ~~with~~.

~~43.2~~ A CBTC can only be issued when all relevant tests from the (vertical) standard applicable to a specific component/end-product have been conducted as opposed to horizontal (e.g. IEC 60529) standards that are called up by a vertical standard (e.g. IEC 60335-1). Consequently:

~~- no stand-alone CBTC shall be issued based exclusively on IEC 60529 requirements, and~~

~~- no stand-alone CBTC for a component (e.g. for thermal motor protector) based exclusively on requirements included in the vertical standard(s) (e.g. IEC 60335-1) for that component as opposed to CBTC based on relevant standard (e.g. IEC 60730-1 and -2-2) unless specifically allowed by CMC Decision or as specified in clause 9 of this OD.~~

~~43.3~~ Exception: When the end-product standard contains EMC requirements (e.g. IEC 60730-1), a CB Test Certificate can be issued for only the EMC section of the safety standard, if so requested by the Applicant. The certificate shall clearly identify that only EMC requirements have been addressed. However, it is not possible to issue a certificate for the safety section only without the integrated EMC section.

~~43.4~~ CB Test Certificates are not required to mention Corrigendum in the field titled "A sample of the product was tested and found to be in conformity with".

### 54. Reference of Component Standards in the CB-Test Certificate

~~4.4 5.1~~ Component Standards referenced in product standards shall **not** be identified (itemized) in the CB-Test Certificate.

### 65. Products Tested Against Multiple Standards

~~6.1~~ In some cases where there can be multiple product standards, such as IEC 60335-1, IEC 60335-2-7 and IEC 60335-2-11, are applicable to the product(s) covered, all shall be evaluated and listed in which case all of them shall be identified (itemized) on the CB-Test Certificate.

~~65.2~~ CB Test Certificates for EMC are normally stand-alone certificates when testing is done according to a dedicated EMC standard. When the safety standard also calls for EMC testing, the EMC standard is to be included on the CBTC together with the safety standard.

Comment [JQ6]: This is old text. Waiting for WG10 to finalize section 2.

Comment [JQ7]: Categories not used on certificates

Formatted: No bullets or numbering

Comment [08]: Added to address Decisions ACAG/1266/DSH (Stockholm) and ACAG-PDSH 837 plus ACAG/1004/DSH (Jeju)

Comment [09]: As above

Comment [010]: Approved recommendation A7 from the 2015 WG 9 report to CMC, see CMC decision 41/2015

Formatted: Indent: Left: 0.63 cm, No bullets or numbering

Formatted: Indent: Left: 0.63 cm, No bullets or numbering

Comment [JQ11]: Editorial change only.

Comment [012]: To address decision CMC 29.2/2004 (from Kyoto) related to EMC certificates

## 76. Reporting under “~~Additional~~ ~~Other~~ Information”

Comment [JQ13]: Correcting terminology to match test certificate.

7.1 If the product is tested and evaluated in accordance with a horizontal standard for a more stringent requirement than is contained in the Product Standard, this information may be reported in the “Additional Information” ~~UNDER the appropriate section~~ of the ~~Test Certificate~~ ~~CBTC~~, “~~Other information~~”.

Formatted: Indent: Left: 0.63 cm, No bullets or numbering

~~NOTE: The relevant Test Report shall obviously contain this information in detail with the testing/measuring results.~~

Comment [JQ14]: Not needed.

## 1 ~~CB Test Certificates for Sub-Assembly and Electronic Devices~~

~~Subassemblies and electronic devices, e.g. electronic units control for whirlpool baths, that can be integrated/incorporated as such into end products are entitled to be tested and granted with a CB Test Certificate.~~

Comment [JQ15]: Moved to new section 9.

~~⇒ The WG also agreed to slightly amend the current decision for the sake of clarity (to be done).~~

Comment [JQ16]: Irrelevant information

## 87. Definition of Product Families, Family Ranges or Series of Products

87.1 A product family can be defined by the maximum configuration, a list of components/sub-assemblies plus a description of how the models are constructed from the maximum configuration and list. All models which are included in the family typically have a common design, construction, parts, or assemblies essential to ensure conformity with applicable requirements. For the same products, there may be differences in defined product families that are contingent upon the nature or type of compliance criteria applied (e.g. safety, EMC, performance, efficacy, etc.).

87.2 If a product standard defined a product family, in the context of the specific standard, this definition takes ~~precedence~~ ~~ever~~.

Comment [JQ17]: Editorial.

## 98. Maximum contents of ~~CB~~ Test Certificates

Comment [O18]: Editorial

98.1 A ~~CB~~ Test Certificate shall in general not contain more items or types of equipment than specified below:

### Accessories:

There shall only be one type in each certificate, for instance a single pole and a double pole switch should not be in the same ~~Test C~~ertificate.

### Appliances:

There shall only be one appliance in each ~~Test C~~ertificate, for instance a drill of 150 W and a drill of 300 W should not be in the same ~~Test C~~ertificate. However, ~~Test C~~ertificates e.g. for room heaters of the same shape but of a length varying in accordance with the wattage (x watts per meter of the length of the room heater) may include a whole series of room heaters.

### General:

Disclaimer: This document is controlled and has been released electronically. Only the version on the IEC EE Website is the current document version

Only equipment applied for at the same time can be in one Test Certificate.

#### 7.1 Minor modifications to be covered by CB Test Certificates

For minor modifications such as the change of identification marks and similar changes an addendum sheet correctly signed may be used, but it is also possible to issue a new certificate on this basis in order to have the right date.  
Listing product categories and product standards  
The CBTC shall list only the Product Category(ies) and Product Standard(s) against which the product has been assessed (tested and evaluated) and determined to be in compliance.

**Comment [JQ19]:** Covered in section 2 with current practice.

**Comment [JQ20]:** Categories not utilized on certificates.

### 109. Exceptional Case Requirements

109.1 A standalone CBTC can be issued ~~be issued~~ for the following products:

- Component power supplies evaluated to IEC 60601-1:2005, 3rd Edition and IEC 60601-1:2005, 3rd Edition with Amendment 1. Where the Risk Management Process, as required by IEC 60601-1 is not performed, the additional information field of the CBTC shall clearly indicate "The risk management requirements of the standard were not addressed."
- Products ~~only~~ evaluated to the IEC 62471 series only when the additional information field of the CBTC clearly indicates "Only photobiological hazards have been addressed."
- Products ~~only~~ evaluated only to IEC 60825-1, IEC 60825-2 and IEC 60825-12 when the additional information field of the CBTC clearly indicates" Only hazards resulting from laser radiation have been addressed."
- Subassemblies and electronic devices, e.g. electronic units control for whirlpool baths that can be integrated/incorporated as such into end products.

**Comment [021]:** CMC Decision 072/2011 (Istanbul) and OD 2055

**Comment [022]:** Par. 9 added to address Decisions on MED power supply without Risk management, but also PAC decision on certificates for lasers and photo-biological lamps See, PAC/24-2014/DSH, PAC/45-2015/DSH, PAC/22-2012/DSH (Previously 2023)

109.2 When the reference standard IEC TR 62471-2 is used, it should not be listed in the standards section of the CBTC. It may, however, be listed in the additional information field of the CB Test Certificate and the summary section of the Test Report.

**Comment [023]:** Decision AAG / 527 from 2008 in Jeju

**Comment [024]:** PAC Decision 65/2015

109.3 A CBTC can be issued for a Part 1 only, provided there is no Part 2 for the relevant product. Once the relevant Part 2 standard is published, the original Certificate and Test Report shall be withdrawn and retesting done to include Part 2.

**Comment [025]:** Decision Misc. 1 Geneva 2007

109.4 Where a standard contains requirements related to production line testing, these requirements can be excluded from the type tests and from the CB Test Report. A CBTC can be issued in this case, as long as, the certificate contains a statement that third-party on-site verification on the production line testing was excluded. (Example: CBTC issued based on IEC 62035 without clause 7).

**Comment [026]:** CMC Decisions, CMC\_16a/2009 (Stockholm); CMC\_005/2012 on Production Line Testing (from London) and PAC\_ACAG1397DSH from Stockholm

109.5 Only one trade mark or brand name can be included on the CBTC with the understanding that:

a) It applies to brands owned by others than the Manufacturer holding the CB Test Certificate or the CB-FCS C.A.C.

b) If the applicant includes a trademark or brand name with their CB Test Certificate application, or it is otherwise known that a trademark or a brand name will be used on the

Disclaimer: This document is controlled and has been released electronically. Only the version on the IECEE Website is the current document version

product, it shall be declared on the CB Test Certificate. If none is declared, there is no obligation to list it in the CB Test Certificate.

c) If there are multiple trademarks or brand names, a separate CB Test Certificate is required for each trademark or brand name.

d) It is permitted to have multiple brand names or trademarks covered in a single CB Test Report.

#### 119. Test Certificate Templates:

General: Electronic copies of Test Certificates created based on approved certificate templates can be used alternatively to signed paper copies.

Annex 1: CB Test Certificate (CBTC)

Annex 2: Conformity Assessment Certificate (CAC)

Annex 3: Type 5 PV Certificate

Annex 34: E3 Statement of Test Results

Annex 45: HSTS Statement of Test Results

**Comment [027]:** Added to address updated CMC\_19c/2005 (Shanghai), PAC/36-2012/DSH and PAC/26-2014/DSH and finally PAC/37-2015/DSH  
The PAC recommended that CMC revise CMC Decision 19/05 to align the terminology used in the Decision and on the CBT Test Certificates by using in the decision "trademark or brand name".

**Comment [028]:** Decision 30/2000 from CMC in Acapulco

**Comment [JQ29]:** French removal and CTF alignment

**Comment [tsm30]:** Not necessary, as already covered by the CAC in Annex 2

Additional information (if necessary)

Additional Information on page 2

A sample of the product was tested and in accordance with the following IEC (standard(s)) as resumed in the table on page 3:

With details shown in the Test Report Ref. No. which forms part of this Statement of Test Results

This product was tested to determine the performance result in accordance with the relevant standard(s).

Participation in the Statement of Test Results (STR) service is for Issuing NCBs only. As the result of testing is a demonstration of test results in accordance with IEC test methods, Recognizing NCBs do not apply. Members and other interested stakeholders may determine the suitability and potential further use of such results. As a result, specification of National differences is not applicable.

This Statement of Test Results is issued by the National Certification Body

Components (IECEE)

## STATEMENT OF TEST RESULTS

Metal | Polymer | Electronic Component

Name and address of the applicant

Name and address of the manufacturer

Sample description

Ratings and principal characteristics

Trademark (if any)

Customer's Testing Facility (CTF) StageLevel  
Type of Manufacturer's Testing Laboratories  
used

Model / Type Ref.

Weight of the sample (in g)

Additional information (if necessary may also be reported on page 2)

The levels of the six hazardous substances were determined in the sample in accordance with the following IEC standard:

As shown in the Test Report Ref. No. which forms part of this Statement of Test Results

Additional Information on page 2

IEC 62321:2008 (ed.1)

This material/component was tested to determine the levels of the six hazardous substances in accordance with the standard

Participation in the Statement of Test Results (STR) service is for Issuing NCBS only. As the result of testing is a demonstration of test results in accordance with IEC test methods, Recognizing NCBS do not apply. Members and other interested stakeholders may determine the suitability and potential further use of such results. As a result, specification of National differences is not applicable.
